**Tax Abatement Model Estimates**

**Assumptions**

- 1) For new construction, construction as a % of real cost is assumed to be 90% if the price of land is included or 100% if it is not.
- 2) In order to provide a conservative estimate, the Indianapolis Region assumes the assessed value of the real property is 80%. Please note that the assumed percentage may vary in other communities.
- 3) Equipment is depreciated based on the most common depreciation pool. Some equipment may qualify for varying amounts
- 4) This model assumes no changes in assessed value of Real Estate over the term of the abatement

This model provides estimates only. Actual tax abatement amounts may vary. Abatement terms and duration are local decisions  
This model calculates taxes due as part of the equation to determine taxes abated. This model should not be used as a forecast of revenue or taxes assessed.
