Annexation Petition

Brandon and Jennifer Soots seek approval to have their property located at 7540 E CR 300N, Brownsburg, IN. be annexed into the Town of Brownsburg. Most recently (May, 15, 2012), this property was given approval for use variance of having one of the outstanding buildings act as a photography studio. The subject 2 acres were the homeplace and hub for a farming operation that has now been developed into a residential subdivision. This subdivision is currently annexed into the Town of Brownsburg.

7540n E CR 300N, parcel # 32-07-23-400-007.000-015 is currently zoned agriculture and is to be changed to 'R-1' upon annexation into the Town of Brownsburg. The type of annexation is to be 100% voluntary and the entire 2.15 acre tract is to be annexed.

The following information was given in support of the stationary requirements for approval of variance request:

1. the approval will not be injurious to the public health, safety, morals, and general welfare of the community because the photography studio is a one person/low-key venture; and
2. the use and value of the property included in the variance will not be affected in a substantially adverse manner since the use of a photography studio will have little impact on the adjacent area, considering that the entire tract is approximately 2 acres in size and that the parking 'area' will be near the center of the parcel, which is near the proposed studio building. As part of the requirements upon the subdivision that surrounds three sides of the subject tract, the developer was required to place screening through the use of vegetation. The existing buildings also provide screening, but with only an average of 3 appointments per week throughout the year, there appears to be sufficient screening in place; and
3. the need for variance arises from some condition peculiar to the property involved since the 2 acres as the former hub of a large farming operation is now an anomaly. The outbuildings lend an opportunity for background pictures and albums of graduates, families; and
4. the strict application of the terms of Zoning Ordinance will constitute an unusual and unnecessary hardship if applied to the property for which the variance is sought because the property has structures that are not used in residential settings, but can be utilized for the studio operation. The zoning districts for both Hendricks County and the Town of Brownsburg would open up many issues for the property, which may not be in the best interest of the general area. While the Town of Brownsburg has the availability of "Use Variances", the county does not. Therefore any petitions through the County would be in the nature of Zoning petitions,

rather than a Use Variance through which limitations of the use are more available; and

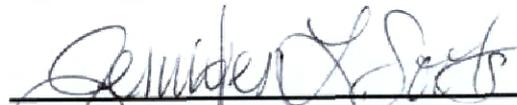

5. the approval does not interfere substantially with The Comprehensive Plan since the use does not interfere with the residential classifications in the area. The residential appearance of the site will not change. The traffic will be similar to that of a strictly residential use and in fact will be less until the home is again made habitable. A Use Variance appears to be more of a viable means to allow the petitioner his use of a studio, rather than pursuing a commercial classification, which could allow more intense uses in the area.

Respectfully Submitted,

Brandon Soots
